H.E. MR. RUSTAM N. MINNIKHANOV
THE HONORABLE PRESIDENT OF TATARSTAN
KAZAN, REPUBLIC OF TATARSTAN

SUBJECT: A new Successful Technological Collaboration between Iran and Tatarstan
(Condensate Demercaptanization plant on phases 2&3 of South-Pars gas field)

His Excellency,

It is a matter of honor for me as the President of Research Institute of Petroleum industry (RIPI), the research branch of Iran's Ministry of Petroleum, to inform your Excellency of recent results of another successful collaboration between RIPI and its counterparts in Tatarstan, "J.S. VNIUS" and the "Tatarstan Academy of Sciences."

On April 2022, a new plant for removing mercaptans from gas condensates with the capacity of 80,000 BPD has been commissioned in Phases 2&3 of south pars gas field in Iran. The plant was built for the Pars Oil & Gas Company (POGC), and will be operated by the South Pars of Gas Company (SPGC). This unit was built based on the joint technology provided by J.S. VNIUS and RIPI.

Your Excellency, it has been more than 20 years that RIPI, J.S. VNIUS and Tatarstan Academy of Sciences are working together to develop the required technologies for the Petroleum Industry, and we certainly appreciate their brotherly assistance throughout the years, especially Prof. A. Mazgarov. Furthermore, I would like to herewith express my sincere gratitude to your Excellency for the continuing support of this technological collaboration.

RIPI avails itself of this opportunity to renew to the esteemed President of Tatarstan, the assurances of its highest consideration .

SINCERELY YOURS,

JAFAR TOWFIGHI
PRESIDENT

**Его Превосходительству
Рустаму Минниханову
Президенту Республики Татарстан**

Кас.: Новое успешное техническое сотрудничество между Республикой Татарстан и Ираном на газовом месторождении «Южный Парс» фазы 2 и 3 на установке демеркаптанализации газового конденсата

Ваше Превосходительство!

Считаю делом чести для себя как Президента Научно-исследовательского Института Нефтяной Промышленности (RIPI), Научно-исследовательского филиала Министерства нефтяной промышленности Ирана, сообщить Вашему Превосходительству о последних результатах продолжающегося успешного сотрудничества между RIPI и его партнёрами в Татарстане, АО «ВНИИУС» и Академией Наук Татарстана.

В апреле 2022 года на газовом месторождении Южный Парс в Иране фазы 2, 3 введена в эксплуатацию новая установка для удаления меркаптанов от газового конденсата мощностью 80 000 барр. в день. Установка построена для Pars Oil & Gas Company (POGC), и будет эксплуатироваться Газовой компанией Южный Парс (SPGC). Эта установка построена по совместной технологии АО «ВНИИУС» и RIPI.

Ваше Превосходительство, уже более 20 лет RIPI, АО ВНИИУС и Академия Наук Татарстана работают совместно над разработкой технологий, необходимых для нефтяной промышленности, и мы ценим их братскую помощь, оказываемую на протяжении этих лет, в особенности помощь проф. А.Мазгарова. Кроме того, я хотел бы тем самым выразить мою искреннюю признательность Вашему Превосходительству за продолжающуюся помощь в этом технологическом сотрудничестве.

RIPI пользуется этой возможностью, чтобы вновь обратиться к уважаемому Президенту Татарстана с заверением в его высочайшем уважении.

С уважением,

Джафар Тоуфиги
Президент Исследовательского института
нефтяной промышленности (RIPI)
